

## Using user defined soil map in kineros2

Posted by drsena - 2008/09/19 19:46

---

Hi

Please help me how i can use already defined soil map of a small watershed(s) (600 ha to 3500 ha)in AGWA-KINEROS2/SWAT. Does Kineros2 support FAO world soil map formats? I have a few watersheds in india where I use AGWA-KINEROS2 to simulate soil loss and runoff. Please help.

AGWA, and KINEROS and SWAT, does support the FAO digital soil map of the world but does not support custom soil maps. You can download the FAO soils for your region via the Downloads section of the website.
